

# BIMATRAZ

## AMITRAZ 12.5% EC

**DESCRIPTION:** BIMATRAZ is an acaricide for veterinary use as a stock spray and dip against ticks, mange, mites and lice on cattle, sheep, goat and pigs. BIMATRAZ controls ticks that are resistant to arsenicals, organo-chlorines, organo-phosphates and carbamates. It should not be mixed with any other dip or spray.

**TIMING:** It is important to regularly wash or spray your animals at the specified times for the approved species. This product should not be used in such a manner as to directly or through drift expose workers or other persons to the spray mist.

### DIRECTIONS FOR USE / RATE OF APPLICATION

**TICK CONTROL:** (Cattle, Sheep & Goats)

Measure the total amount of water required, remove a small amount from this volume and use it to premix Bimatraz. Add the premix to the measured volume and mix thoroughly. Surplus acaricide should not be used the next day. Fresh wash should be prepared daily, for both hand and mechanical spraying.

BIMATRAZ is for external application only.

### DIP

-Initial Fill:- 1 litre Bimatraz in 500litres of water plus 3.5kg of stabilizer per litre of Bimatraz use.

-Replenishment:- 1 litres of Bimatraz in every 250 litres of water added and 3.5kg of stabilizer per litre of Bimatraz use.

### HAND SPRAY

Dilute before use by pouring the required amount of concentrate into the container of water and mix thoroughly by stirring.

- Dilute 40ml Bimatraz per 20 litres of water (1:500), 5 litres of spray volume are enough for 1 cow. Make enough wash for the day's use only.
- Repeat after 7 days for optimum tick and tick-borne disease control.
- Under heavy tick challenge clipping hairs from ears and tail brushes will assist wetting.

### WITHHOLDING PERIODS:

There is no treatment to slaughter interval for meat from cattle, sheep and goats. BIMATRAZ can be used on lactating dairy cattle.

There is no withholding period for milk following application to dairy cows. Do not apply to pigs within one day of slaughter.

### WHY USE BIMATRAZ ON YOUR ANIMALS

**It Kills and controls ticks and mange in cattle, sheep and goats., Kills tick - eggs, spreads all over the animal's skin or hide, works fast and longer, Kills all stages of ticks i.e larva, nymphs and adults, Is safe to use and is the trusted name in tick control.**

### PRECAUTION

- Always discard spent wash at the end of one day's spraying.
- Do not keep for re-use
- Do not mix with any other Acaricide
- Keep out of reach of children
